

Custom Home Job Information Sheet

Residence Name : _____

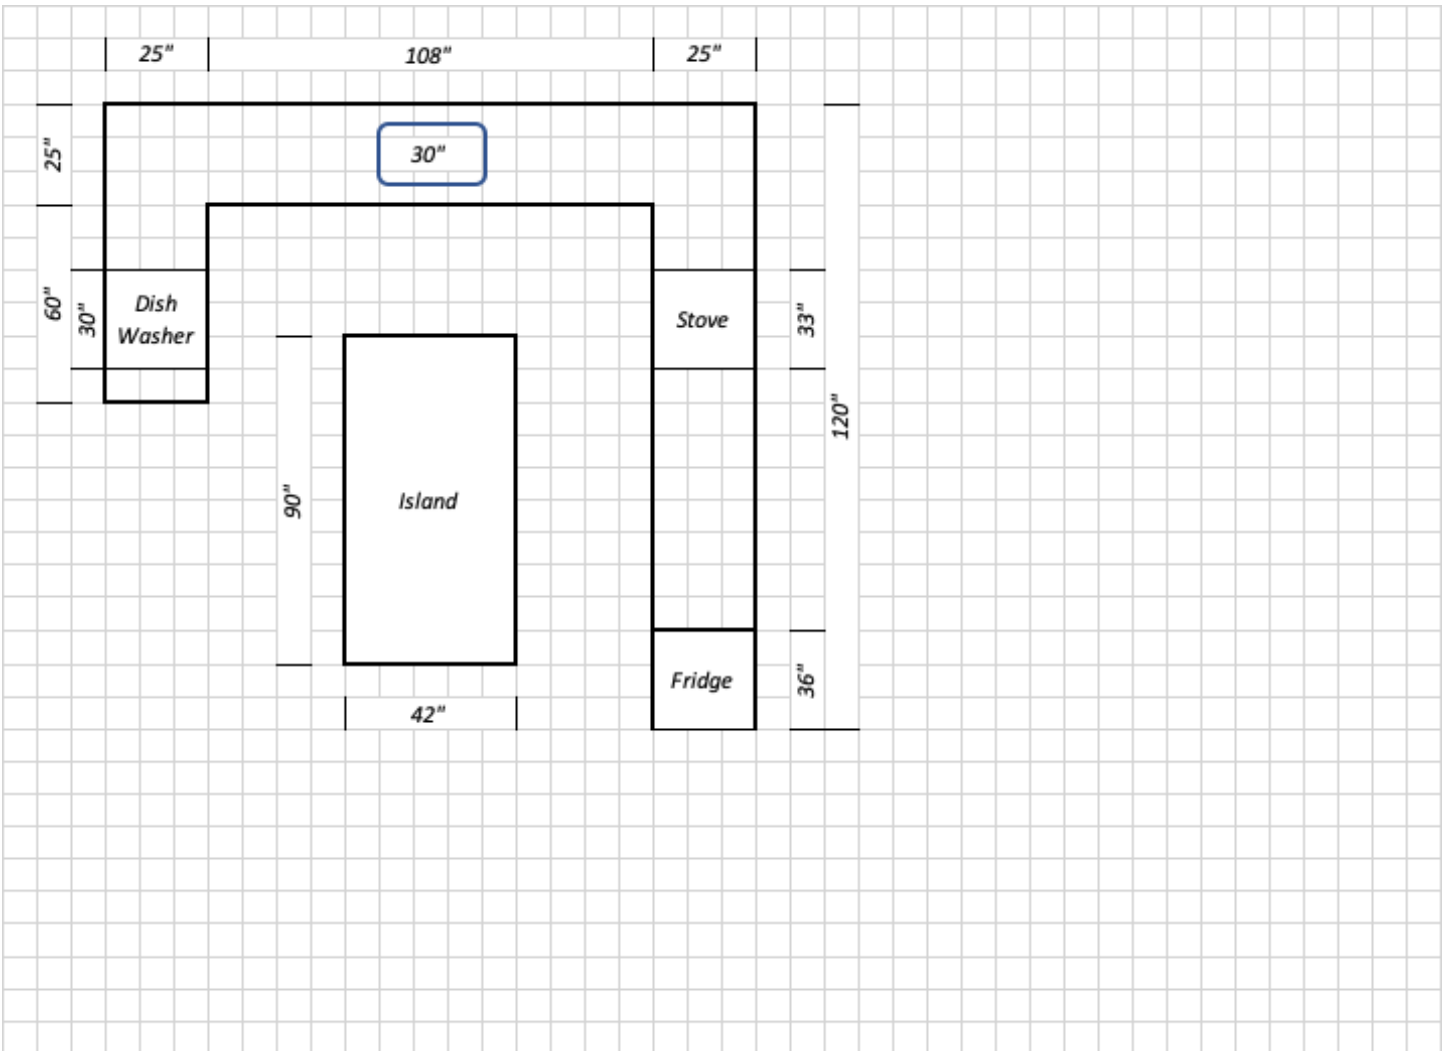

Number and e-mail: _____

TSCC contact: _____

Key steps to get started:

1. Tape measure, ruler, and paper
2. Draw a simple layout of your kitchen and / or bathroom countertops
3. Identify where sinks, appliances and walls are located
4. List measurements of countertops, appliances and other spaces on your drawing (length and width in inches)
5. Measure each countertop section separately
6. Measure Islands, windowsills and other unique areas separately

Note: TSCS will measure your home precisely with a laser measurement device before the job officially starts

Countertops are priced primarily by square footage. Square footage determined by taking the measurements in inches and using $(\text{length} \times \text{width} / 144)$ for each piece and adding them together
